Text classification and Quantitative (text) analysis

Digital Methods

Julie Hvidsteen

20th of May 2025

UNIVERSITY OF COPENHAGEN

To do list

TUESDAY

1) Work on quantitative text analysis
2) Label test set for evaluating classifier
3) Feedback for milestone 3

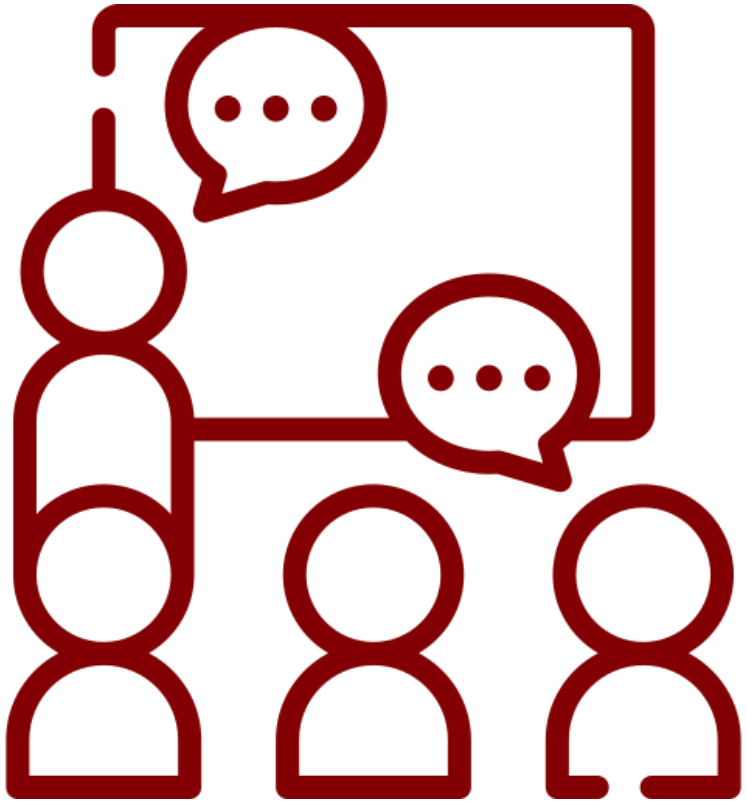
General feedback for Milestone 3

1. **Revisit your research question**
   Ensure your study directly addresses every component of your RQ.
   Ask yourself: *Am I clearly answering all parts of the question?*
2. **Clarify your understanding of coding stages (open, focused, closed).**
   Consider using a figure to show each step of the coding process.
3. **Manually validate your method**
4. **Use visuals to show your analytical process.**
   Include figures or flowcharts to represent your journey -> from data collection to final analysis. It could help clarify complex part of your work and enhance reader understanding.

Milestone 4 - Presentation

Milestone 4 – Friday, *30th of May* - 30 min per group depending on the number of groups and size of groups.

A slideshow with 7 slides:

1) Research question and motivation
2) Description of datasite and topic
3) Data design
4) 3 slides for analysis and results(BOTH qual and quant)
5) Conclusion


15 min presentation per group and 15min plenum discussion with peer and TA feedback.
