Data design and data collection

Mihaela Capriean
29th of April, 2025

UNIVERSITY OF COPENHAGEN

Any questions from the lecture?

Notes

- **Milestone 2** – Friday, 2nd of May, 23:59, via email to TA (xbk406@sodas.ku.dk)
- Feedback – next seminar
- Submission should contain:
  1. Updated research question
  2. Data collection plan
  3. Preliminary data analysis design
- Remember to book your supervision slot for Thursday – seminar hours are held as usual.

Data collection and sampling strategy

Data integration models

How different forms of data relate to one another

Integreted

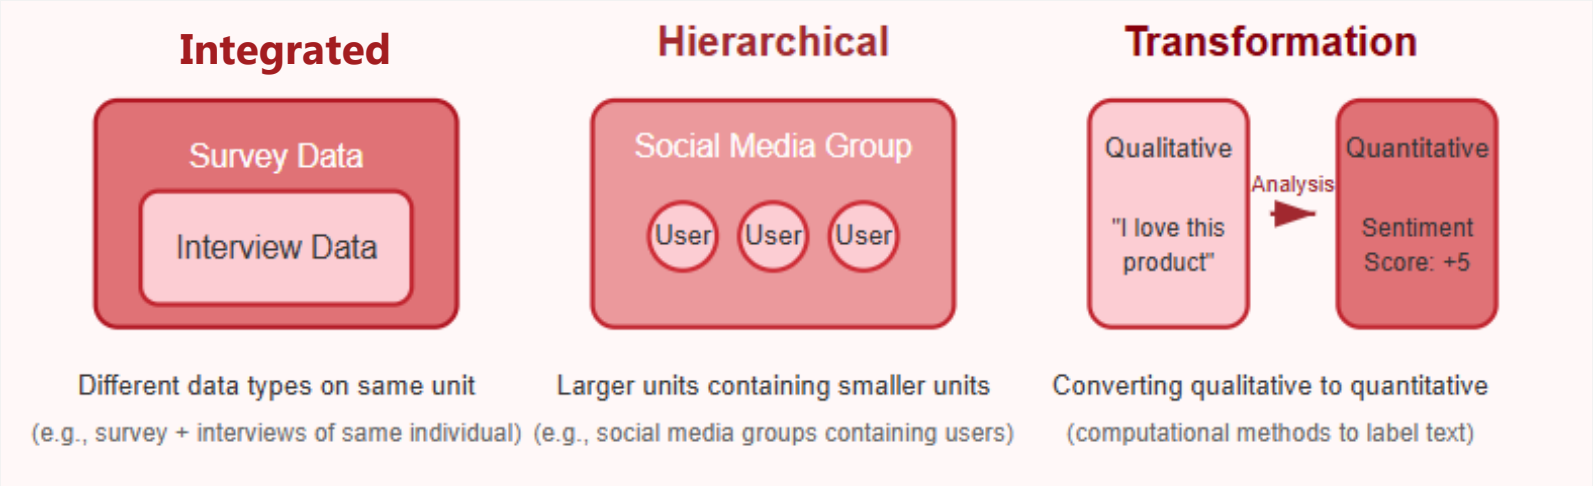
Different types of data on the same unite (e.g., survey + interviews of same individual)

Hierarchical/Nested

Larger units containing smaller units (e.g., social media groups containing users)

Transformation

Converting qualitative to quantitative data through analysis (computational methods to label text to get a count variable)



Sampling types

Rafail, p.198-199

Actor-based: Focus on specific accounts/users

Topic-based: Focus on content about specific topics/hashtags

Location-based: Geographic focus

Mixed approaches: Combining strategies for comprehensive coverage

Agenda

1. Project updates

- One slide updates

2. Designing data collection sampling strategy

- First, informed by your readings and RQs, assess the **types of data** you need to collect, and what **sampling populations** (i.e., unbounded, semi-bounded: user-/topic-restricted, bounded) you require, along with the **sampling strategy**.

3. Initial testing of data collection feasibility

- Test out potential ways of retrieving the data, and assess whether your collection returns the **desired variables**.

Tak for i dag!

Next time: Supervision

Seminar on Thursday: Working on data collection

- No readings.
